

ConePro 600

TRAFFIC CONE MOUNT UP TO 40' SPANS

ConePro, is a retracting belt unit that fits onto most types of traffic cones and creates a barrier that is more effective at restricting access than cones alone. The 600 model features belt lengths from 15'/4.6m to 40'/12.2m allowing cones to be spaced further apart saving set up time. Heavy duty nylon construction means the belt won't fray or break even in the toughest conditions. A retraction lock relieves tension on the belt allowing lighter cones to be used and a belt lock prevents accidental belt release.
