

Elegance Rope Stanchions

TRADITIONAL STYLE

Traditional rope stanchions are the last word in style and sophistication. Our Elegance range is a premium product line manufactured from heavy gauge steel/stainless steel with solid cast iron bases that offer excellent durability. The posts are finished with the highest grade polished or satin finishes and are available with three finial options, the elegant ball, the traditional crown, and the contemporary flat top. Each of these can be matched with one of two base options, the dome for a traditional look or the low profile flat base for more contemporary environments.

Forged Rope Loop

High mirror or smooth satin finishes

Heavy gauge steel/stainless steel construction

Cast iron base with replaceable cover

Full coverage floor protector - flat base

Full circumference floor protector - dome base
