

Merchandizing Wheel

MAXIMUM MERCHANDIZING

The Merchandizing Wheel can be used alone or with the Queue Solutions Display Bowl to optimize the merchandizing capacity of your queue barriers. The wheel simply slips onto the top of the barrier and has capacity for up to 8, 12 station Clip Strips. When merchandized the Merchandizing Wheel provides an eye catching retail display right in the best impulse buy location, the customer queue. The wheel's high capacity reduces the frequency of restocking. If used as a standalone fixture all 8 positions can be loaded allowing the unit to be merchandized through 360 degrees, if used at the end of the queue line 7 positions are available and when at a mid point in the line 6 positions can be merchandized.

Clip Strips, Display Bowl and Pricing Strip sold separately
