

Recessed WallPro

FLUSH FIT WALL MOUNT

The Recessed WallPro is designed to be set into a wall cavity providing a discrete method of restricting access to corridors. The unit's face plate fits flush to the wall and can be powder coated to suit any décor. The Recessed WallPro is available in four belt lengths and can be ordered with a variety of belt ends to suit specific applications. Standard, Universal and Panic Break belt ends are supplied with a receiver clip for attaching the belt end to the opposite wall.
